

Make layered chalk jars

1. Pour a heaped spoonful of table salt onto a piece of paper.
2. Roll a piece of coloured chalk back and forth over the salt to colour it.
3. Using a funnel, carefully pour the first layer of colour into a small jar.
4. Repeat with various colours until the jar is full to the very top. Take care not to shake the jar as you fill it, or the layers might mix together.
5. Fasten the jar, or seal it to prevent little hands opening it!
